1. Qualitative Information on Quarterly Financial Performance

(1) Explanation of Results of Operations

In the first nine months of the fiscal year ending in June 2016 (July 1, 2015 to March 31, 2016), the Japanese economy recovered slowly as corporate earnings increased. There were signs of improvements involving capital expenditures and the job market due to economic stimulus measures by the Japanese government and monetary easing by the Bank of Japan. Although consumer spending is continuing to recover, the rebound in consumer sentiment is very slow mainly because of the sluggish pace of the growth of real wages. As a result, the outlook is still unclear.

Both the reuse market and e-commerce market in Japan, where MarketEnterprise operates, continue to grow steadily.

In the reuse market, public awareness of "low prices" and "smart consumption" is continuing to increase. In addition, the number of people, mainly young people, who buy products with the intention of selling them when no longer needed is increasing as more consumers become aware of the benefits of the sharing economy.

In the e-commerce market, the use of the Internet is increasing among people of all ages, both men and women, along with growing number of tablets, smartphones, and other smart devices in use. As a result, people become accustomed to using the Internet to purchases products and services. Furthermore, the cross-border e-commerce market spanning other Asian countries is showing signs of becoming very active. In Japan as well as other countries, the e-commerce market is continuing to grow.

MarketEnterprise has made substantial up-front investments in the first nine months to build an infrastructure that can maximize sales and earnings growth in the coming years as the reuse merchandise and e-commerce markets continue to expand. Expenditures were made to recruit people for developing new services and strengthening internal administrative and management operations. There have also been investments in equipment at existing business sites in order to handle a larger volume of merchandise and improve productivity.

In the first nine months, sales were 3,566 million yen, 27.4% higher than in the same period of the previous fiscal year, and gross profit was up 26.3% to 1,663 million yen. Selling, general and administrative expenses increased 30.7% to 1,558 million yen because of substantial up-front investments. Due to the resulting temporary increase in these expenses as a percentage of sales, operating income decreased 15.4% to 105 million yen, ordinary income decreased 13.5% to 104 million yen and profit decreased 15.0% to 62 million yen.

(2) Explanation of Financial Position

Assets

Total assets at the end of the third quarter of the current fiscal year increased 200 million yen from the end of the previous fiscal year to 1,501 million yen. This was mainly due to increases of 20 million yen in accounts receivable-trade associated with sales growth, 81 million yen in merchandise due to the growth in purchases and 38 million yen in property, plant and equipment due to opening of business sites.

Liabilities

Total liabilities increased 138 million yen from the end of the previous fiscal year to 557 million yen. The main reasons were a decrease of 64 million yen in income taxes payable as taxes were paid, and increases of 82 million yen in current portion of long-term loans payable and 111 million yen in long-term loans payable as a result of the drawdown of new loans.

Net assets

Net assets increased 62 million yen from the end of the previous fiscal year to 944 million yen. This was mainly due to a 62 million yen increase in retained earnings due to the booking of profit.

(3) Explanation of Earnings Forecast and Other Forward-looking Statements

MarketEnterprise has revised its full-year earnings forecast for the fiscal year ending June 30, 2016 that was announced on August 7, 2015.
