

Q&A Session

President & CEO of MarketEnterprise Co., Ltd. Kobayashi Yasushi

Q & A: How Much Intend to Invest

Questioner 1 You explained you are near the exit of the period of investment. In the future, how much will you intend to invest?

Kobayashi There are some parts to invest in each business. I'm going to do that for improving profit rates such as 5.3 percent of the previous operating profit and 6 percent of this term.

For example, as a clear investment, in second-hand online business, building new purchasing base is essential. And, as an investment in the IT we consider automation as possible as we can and improvement in productiveness.

As to media, we are going to acquire a business, enforce the basis, and strengthen marketing. Although I do not have the detail figure now, there is the plan to increase profit rate with investment still going.
